This series has **intrinsic safety inputs**: They are associated equipment, placed in safe area. They have input circuits for connection to a sensor placed in hazardous area and output circuits for connection in safe area only. These instruments have obtained a UE examination certificate of the type according to the prescriptions of the standards EN 60079-0 (2006), EN 60079-11 (2007), EN 60079-26 (2007), EN 61241-0 (2006) and EN 61241-11 (2006), in accordance with the directive ATEX 2014/34/UE.

Marking 0344 II(1)GD, [Ex ia] IIC and [Ex iaD].

► 3 input versions:

Process input: $\pm 100\text{mV}$, $\pm 1\text{V}$,
 $\pm 10\text{V}$, $\pm 300\text{V}$, $\pm 20\text{mA}$

Pt100 input: Pt100 3 wire

Input: Frequency

► Outputs:

2 NO contact relays
(5A/250 VAC on resistive load)

► CE Marking

Environment

- Operating temperature: -10°C to +50°C.
- Storage temperature: -20°C to +70°C.

A range of products which can be programmed by PC via the software SUPERVision (ARDETEM) or MCvision (SFERE) or with the micro-console.

The μconsole is systematically delivered with the references
DS-SICP/DAS-SICPLUS DS-SICO/DAS-SIC100 DS-SICF/DAS-SICI

Programming

Programming with the micro-console

The series DS/DAS-SI accepts 2 types of μconsoles:
• the old generation with 4 alphanumerical electroluminescent green digits,
• the new generation with graphical rear-lit LCD.

The LCD allows visualising 4 pieces of information:

- the value of the measure (5 mm high),
- the unit of the displayed measure, *
- the tag name of the product*
- the status of the relay outputs and the RS485 data link. *

(*3.5 mm high)

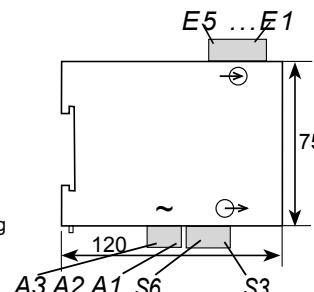

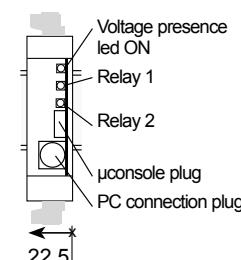

This μconsole with LCD also allows showing these information vertically or horizontally, according to the sense in which the converter is mounted

Configuration software

Each configuration is kept as a file stored on hard or floppy disk. These files can then be consulted, modified, duplicated or loaded into the converters. The files can be created with or without having a converter connected.

This software also allows the saving of existing configurations from the instruments already in service. All files can be edited on any type of printer.

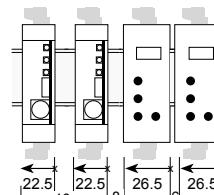

Description

Self-extinguishing case of black UL 94VO ABS.

Protection: housing/terminals: IP20

Mounting in switchbox: latching on symmetrical DIN rail.

Rack version: consult.

Dimensions: 22.5x75x120 mm.
with μconsole: 26.5x80x130 mm

Mount the instruments vertically (on horizontal DIN rail), leaving a 10mm space between each. This mounting allows inserting the μconsole.

Operating T°: -10° to 50°C

Storage T°: -20 to 70°C

▲ A 12 µA pulsed current allows the detection of line or sensor rupture for a cycle time programmed at 100ms.

RESPONSE TIME OF THE RELAYS

(for a variation from 0 to 90% of the input signal)

• DS-SIP/DAS-SIPLUS - DS-SICP/DAS-SICPLUS

Programmable cycle time	Max. response time (ms)	Rejection
16.6 ms	30 ms	60 Hz
20.0 ms	35 ms	50 Hz
100 ms	110 ms	50 Hz / 60Hz

* The response times are guaranteed 10 minutes after setting the converter on tension and 30 seconds after a saving of the programming, a revert from measure overrange or a sensor break.

• DS-SIO/DAS-SI100 - DS-SICO/DAS-SIC100

Cycle time: 100 ms

Response time of the relays: 410 ms max..

• DS-SIF/DAS-SII DS-SICF/DAS-SICI

Sampling time: 100 ms + 1 period of the signal + 10 ms, measured (min. measurable frequency programmable)
