This series has intrinsically safe inputs: they are associated equipment, to be placed in safe area or ATEX/IECEx area 2. They have input circuits for connection to a sensor placed in hazardous area and output circuits for connection only in safe area or ATEX/IECEx area 2. These appliances have obtained a UE examination certificate of the type according to the prescriptions of the standards EN 60079-0, EN 60079-7, EN 60079-11 and EN 60079-15 in accordance with the directive ATEX 2014/34/UE.

Marking: II 3 (1) G Ex ec nC [ja Ga] IIC T4 Gc

Configuration

Easy programming with a micro-console or by PC software SlimSET (via a standard USB / μ USB cable).

Programming with the Micro-console

The graphical rear-lit LCD with tactile keyboard allows the visualisation of the following information:

- the value of the measure with its unit,
- the value of the analog output,
- the product tag name,
- the status of the relay outputs.
- Scrolling message for programming help in various languages
- Passcode protected programming

Programming by PC: SlimSET

Programming software (Windows environment) allowing: The storage of the configurations as files which can be consulted, modified, duplicated or loaded into the converters. The edition and printing of files with or without having a signal conditioner connected.

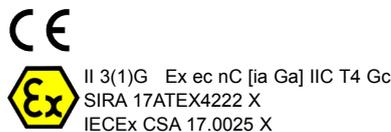

This converter may either operate in an autonomous way or belong to a local network consisting of converters and modules of the range TPIs/ μ Cs.

Each converter or module is latched on the DIN rail via a 5-points footing allowing the distribution of the communication and supply signals (24 Vdc $\pm 30\%$ power supply).

The modules allow to increase the number of analog or relay outputs. Up to 50 modules or converters can be connected on the same bus, and up to 200 different measures can be made to transit.

A supervision and concentrator module (of the range TPIvM/ μ CvM) with output Modbus / Modbus TCP / Ethernet / Profinet / Profibus and option Datalogger on SD card can also be added on the bus.
