

# TWO-COLOUR DIGITAL PANEL METER

## DIP110

The DIP110 is a highly accurate **programmable digital panel meter**, with **IP 65** front face protection. Each appliance is equipped with a two-colour 4 digits 14 mm high display with a brightness which integrates perfectly in applications in industrial control rooms. The extra-thin front face allows a better integration in cabinet fronts. They allow the display, the control and the transmission of data from any measurable magnitudes.

Two display versions are available:

Two-colour display,  
red and green

Two-colour display,  
red and white
